HEADNOTE

> *"1. Oral questions put to the witness who has submitted a written statement already filed in the claimant's case shall aim to clarify points that are not clear and that are contested in the defence.*
> *2. The Court considers on the one hand that English being one of the two possible procedural languages before the Paris Local Division, it is a language used and understood by all members of the panel; and on the other hand, that English being the common working language before all divisions of the UPC, it is presumed to be understood by all representatives before the UPC. The request for simultaneous interpretation of the witness hearing in English is therefore rejected."*

FLUID EJECTION DEVICE WITH DATA SIGNAL LATCH CIRCUITRY

KEYWORDS
Witness examination
Procedural language
Evidence clarification

SUMMARY
The Local Division in Paris issued a procedural order. The patent at issue relates to a fluid ejection device with data signal latch circuitry. According to the headnotes of the decision, oral questions to witnesses must aim to clarify unclear points. These points must also be contested in the defence. This ensures that witness examination remains focused and relevant to disputed issues. Furthermore, the Court rejected a request for simultaneous interpretation of the witness hearing in English. The Court reasoned that English is one of two procedural languages at the Paris Local Division. All panel members understand English. Additionally, English serves as the common working language across all UPC divisions. Representatives are presumed to understand it. As a result, simultaneous interpretation was deemed unnecessary.
